Global Commerce Review

Spain, Q4 2017

Key Findings.

Today's shoppers are active on all browsing environments, they don't stay in walled gardens, and they're buying more on-the-go.

Optimizing your app lets you connect with more of today's mobile-first shoppers.

Apps account for **54% of mobile sales** for retailers who invest in both mobile web and shopping apps.

Combining cross-device data lets you understand the entire shopper journey.

29% of desktop sales are preceded by a click on a mobile device.

Combining intent data lets you see more shopping euros per shopper.

Shoppers matched on another device spend an **average of 8% more** per order.

Mobile web usage reaches maturity, and smartphone keeps growing.

Sales by device, Q4 2016 and Q4 2017, Apps excluded

Q4 YoY

Home/Gardening and Sporting Goods are the two retail subcategories with the highest share of mobile sales.

COMBINING DATA

Combining cross-device data lets you understand the winding shopper journey.

29% of all desktop transactions in Spain are preceded by a click on a mobile device.

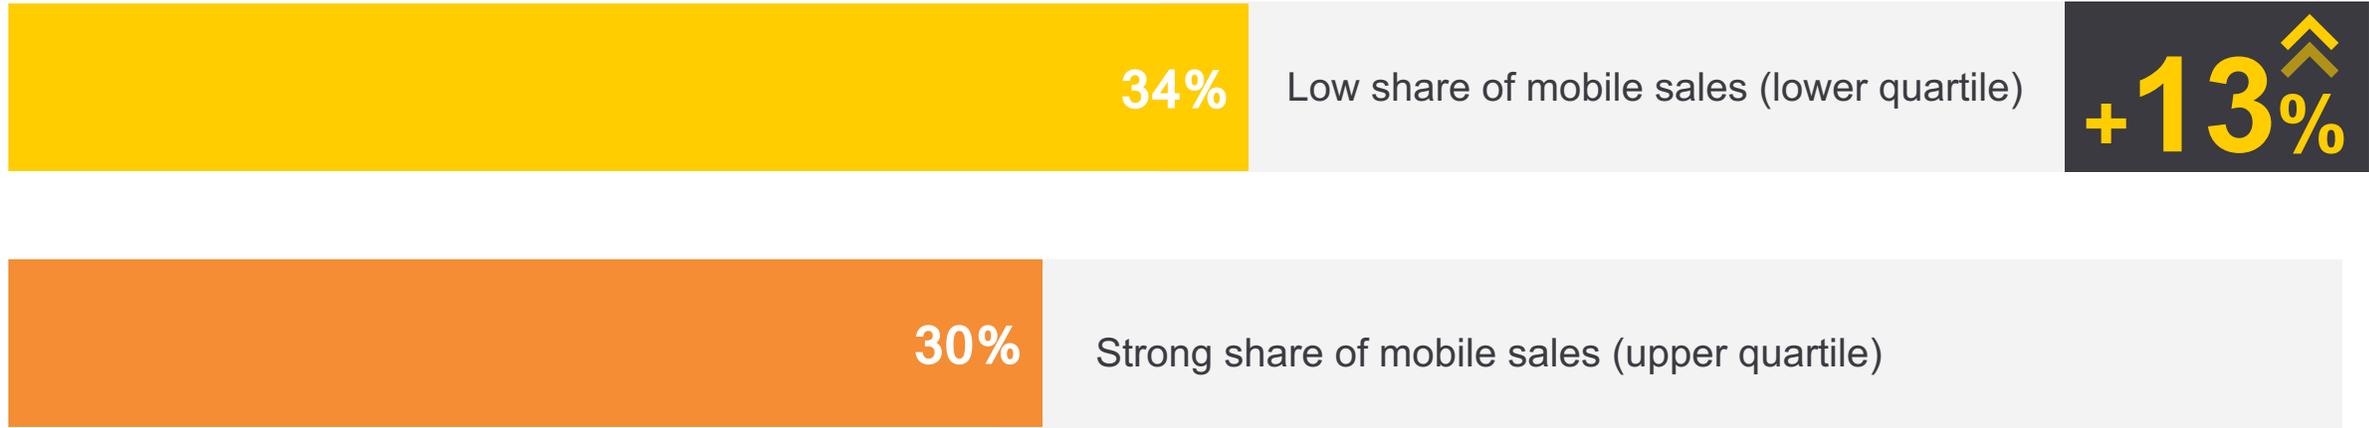

COMBINING DATA

Retailers with low mobile sales get more cross-device transactions.

Share of cross-device transactions* by prevalence of mobile sales

Advertiser takeaway: Combining cross-device data helps make up for a below-average share of sales on mobile

COMBINING DATA

Combining intent lets you see more shopping euros per shopper.

Average order values are significantly higher for matched shoppers: +8% on average.

Offline sales boost shopper knowledge - and online results.

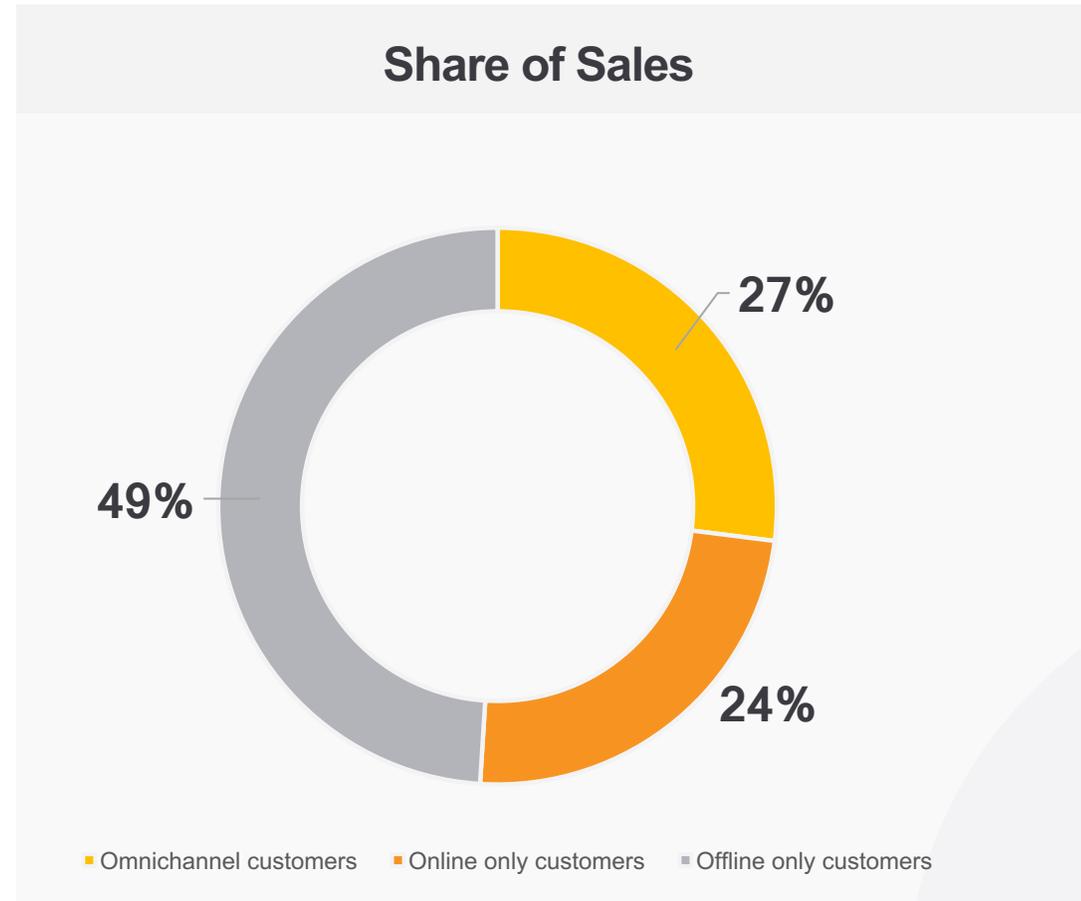

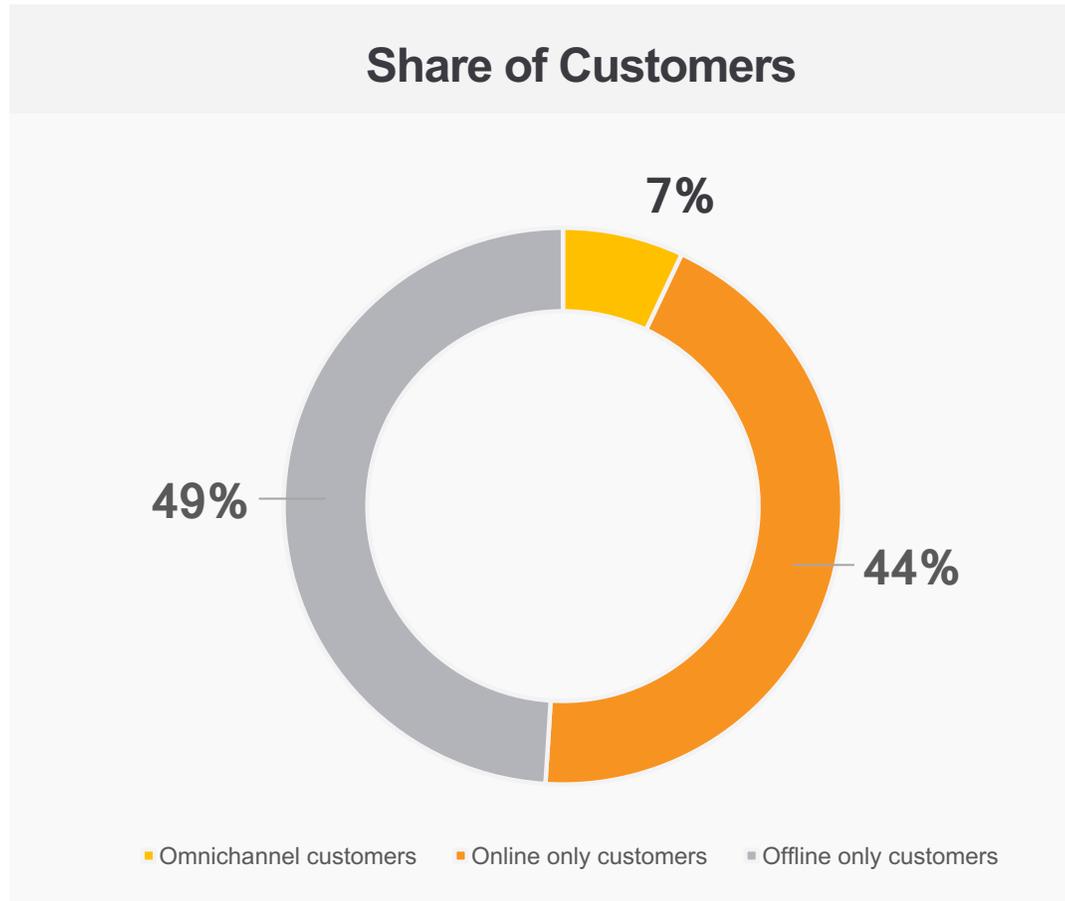

Omnichannel retailers that can combine their offline and online data can apply over four times as much sales data to optimize their marketing efforts.

Omnichannel customers generate the highest lifetime value.

Omnichannel customers generate **27% of all sales**, despite representing only 7% of all customers.
