

A woman in a dark knit hat and red jacket is kissing a young girl on the cheek. The girl is wearing a light-colored winter coat and a blue scarf, and she has a red bow in her hair. They are surrounded by festive lights and falling snow. The background is dark with colorful bokeh lights in shades of blue, green, and red.

2019 FESTIVE SEASON INSIGHTS

Black Friday Data, Hour by Hour

FRANCE

Black Friday 2018 Shopper Activity: France

Hourly Sales and Traffic Trends

Sales spike before lunch and dinner, during mid-afternoon, and before bed.

Most days we see the first peak in sales at noon and a similar peak around 3-4pm. Then the peak increases at 7pm and increases again to reach the climax of the day, at 10pm.

Traffic continues to increase throughout the day, with a steeper rise at 7pm and 10pm.

Shoppers anticipate Black Friday and stay awake for deals.

On the evening before Black Friday, there are significant increases in sales and traffic. Peak traffic for the period comes in at **+216%** just before Black Friday. This indicates anticipation for the weekend of sales.

Some shoppers seem willing to stay awake for deals: While the sales on most days are below an index value of 15, on the night of Black Friday, the low is an index value of 23.

Although many people work on Black Friday in France, it doesn't stop them from shopping. The first peak happens at 10am, **+276** in sales, and sales continue to increase to **+385%** by 10pm. On Saturday sales peak at 7pm.

The Sunday of Black Friday weekend is huge.

Sunday actually sees the highest increase in sales, with an increase of **+419%** by 10pm, possibly from early Cyber Monday sales. On Cyber Monday, the afternoon peak is higher than most days, and we see an increase of **+312%** in sales at 10pm. On Tuesday, sales and traffic trends quickly return to the baseline.

Indexed Hourly Sales and Traffic for France

ONE DAY LOOK – Nov 20

Black Friday 2018 Desktop vs Mobile: France

Hourly Device Type Trends

Desktop sales surge more than mobile sales throughout the day, but mobile sales see higher increases at 10pm.

On Black Friday:

- Desktop sales surge all afternoon and evening, reaching a peak of **+413%** at 7pm.
- Mobile sales surge at 10pm, increasing by **+389%**.

Most of the activity on Sunday happens in the evening, across devices, perhaps because of early Cyber Monday deals:

- Desktop sales start rising at 7pm, peaking at **+410%**.
- Mobile sales peak at 10pm at **+436%**.

Shoppers are back to work on Cyber Monday:

- Afternoon shopping patterns follow a normal workday pattern, though sales are slightly higher.
- Sales peak at 10pm on both desktop (**+290%**) and mobile (**+352%**).

Shopping trends are back to the baseline by Tuesday.

GERMANY

Black Friday 2018 Shopper Activity: Germany

Hourly Sales and Traffic Trends

Most days, sales surge at noon and once again from 6 to 10pm.

Traffic continues to increase throughout the day until 10pm.

On Black Friday:

- There is a significant surge in shopper activity, with increases of up to **+279%** in sales and **+111%** in traffic.
- After a slow down until 4pm, the biggest surge happens, reaching an increase of **+379%** in sales and **+233%** in traffic.

Sunday and Monday shopping patterns are similar to those of usual weekdays (as opposed to the spike at noon on Black Friday). However, the higher amplitude indicates that Cyber Monday has an impact here.

Indexed Hourly Sales and Traffic for Germany

Black Friday 2018 Desktop vs Mobile: Germany

Hourly Device Type Trends

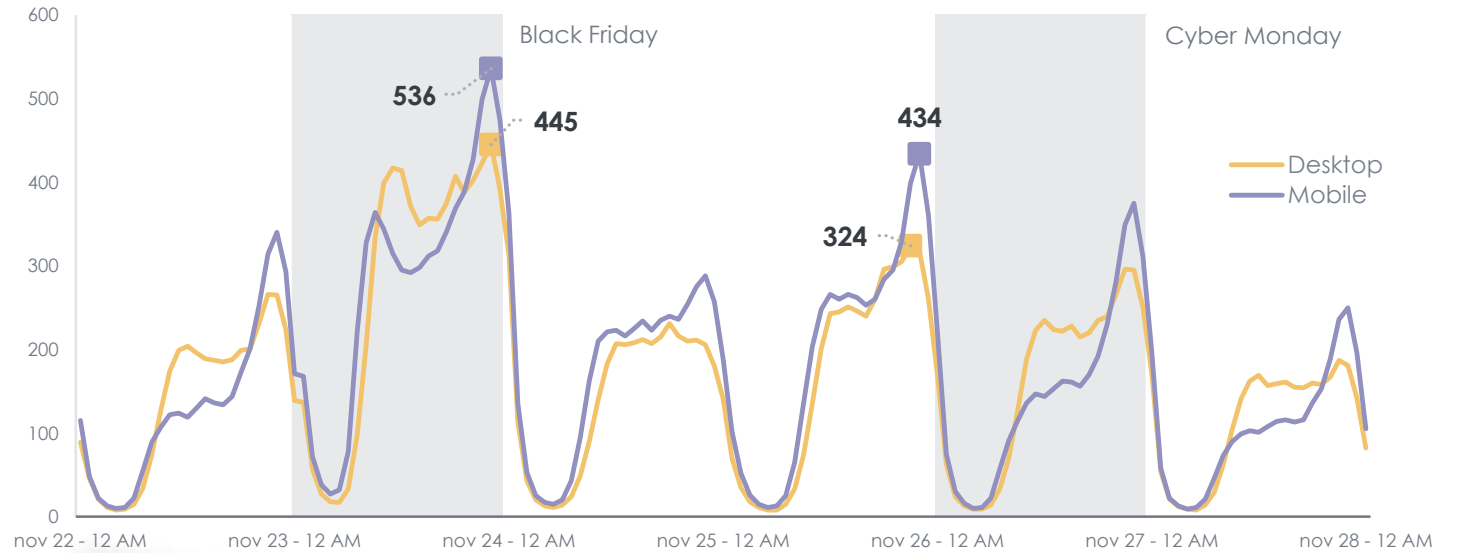

Desktop sales surge the most during the afternoon and slightly increase during the evening unless there's a big sales event, when we often see a larger increase in the evening for desktop.

Mobile sales surge after 5pm and see higher increases than desktop sales.

Black Friday:

- There is an initial surge of **+264%** on mobile by 9am and desktop surges past 9am to **+317%** by 11am.
- Mobile sales increase by **+436%** and desktop sales increase by **+345%** at 10pm on Black Friday.

NETHERLANDS

Black Friday 2018 Shopper Activity: Netherlands

Hourly Sales and Traffic Trends

In the Netherlands, shoppers seem to follow the same trend whether there are sales or not. However, overall activity increases substantially during Black Friday.

Sales and traffic start to rise on the Thursday reaching a peak at 10pm before Black Friday. Black Friday from 12pm to 10pm is the prime shopping time, with sales staying above **+431%** during those hours.

Black Friday sees huge peaks in both sales (**+578%**) and traffic (**+287%**).

Shopper activity on that Sunday and Cyber Monday stay at very high levels:

- Peaking at **+400%** in sales and **200%** in traffic at 10pm on Cyber Monday.
- Reaching **+389%** in sales and **+220%** in traffic at 9pm the night prior.

By Tuesday, sales and traffic return to baseline trends.

Indexed Hourly Sales and Traffic for Netherlands

Black Friday 2018 Desktop vs Mobile: Netherlands

Hourly Device Type Trends

Desktop sales surge more than mobile sales during the day from 10am to 6pm, but the increases during the evening are similar.

During sales periods like Black Friday, desktop sales tend to surge more than mobile sales. From 10am to 6pm, desktop sales stayed above **+471%**, while the highest for mobile was **+387%** in those hours. The peak of Black Friday is reached at 10pm with a **+596%** increase in desktop sales and a **+546%** increase in mobile sales.

On Saturday, when evening sales are relatively low, mobile sales increase more than desktop sales.

ONE DAY LOOK – Nov 21

POLAND

Black Friday 2018 Shopper Activity: Poland

Hourly Sales and Traffic Trends

Most days, sales and traffic surge at noon and once again from 5 to 10pm.

On Black Friday, consumers seem to take advantage of their lunch breaks to shop:

- While normal days see a surge at noon, there is a significant surge of activity around 11am on Black Friday, when sales jump (up to **+575%**) and traffic more than triples (**+216%**).
- After a significant slowdown until 4pm, there is another surge—an increase of **+631%** in sales and **+285%** in traffic.

Sunday sales surge at noon and continue to increase until 10pm.

Shoppers return to work on Monday and shopping patterns are similar to usual weekdays, but the enormous sales peaks (up to **+432%** in sales and **+178%** in traffic at 10pm), indicate that deals, Cyber Monday or otherwise, are happening here.

Indexed Hourly Sales and Traffic for Poland

Black Friday 2018 Desktop vs Mobile: Poland

Hourly Device Type Trends

On Black Friday, there is a significant peak in desktop sales at 11am (+608%) and 10pm (654%). Mobile isn't too far behind, with sales peaks at 11am (+450%) and 10pm (+536%) as well.

The behavior on Black Friday is unique in that the desktop sales surge at noon is much higher than the mobile sales surge in the evening. Desktop and mobile sales increases are similar, except on most afternoons, when desktop seems to be the device of choice for purchasing.

Normal weekend behavior resumes on Saturday, where mobile surges more at noon and then desktop sales surge more in the evening.

RUSSIA

Black Friday 2018 Shopper Activity: Russia

Hourly Sales and Traffic Trends

Russian shoppers do most of their shopping at noon and in the afternoon.

In Russia, we don't see the same evening surge we see in most other countries.

We see some anticipation two days before Black Friday as activity surges at night, when traffic more than doubles (+117%).

On Sunday, we see sales surge at 11pm, possibly due to early Cyber Monday deals.

By Tuesday, sales and traffic return to baseline trends.

SPAIN

Black Friday 2018 Shopper Activity: Spain

Hourly Sales and Traffic Trends

Black Friday sales surges start the night before with shoppers staying up late to grab deals. There is a **+481%** increase at 11pm.

On Black Friday, sales surge at noon (**+536%**) and drop at 3pm (**+372%**) before surging again at midnight, up to a whopping **+668%**.

During sales periods, the 11pm sales surge is much higher than the afternoon spike.

In step with shoppers' growing anticipation of Black Friday deals, evening traffic increases as the big day approaches.

By Tuesday, shopper activity quickly returns to the baseline.

Indexed Hourly Sales and Traffic for Spain

Black Friday 2018 Desktop vs Mobile: Spain

Hourly Device Type Trends

On regular weekdays, desktop sales tend to be greater during the day and mobile sales catch up in the evening.

On Black Friday, desktop sales stay strong throughout the day, peaking at **+683%**. There is a big drop around 3pm, however, indicating consumers are at rest, perhaps taking a siesta.

On Sunday, desktop and mobile sales increases are similar.

Sales are strong on Cyber Monday, when we see more desktop sales in the afternoon and mobile sales catching up by midnight.
